

On reflection,  
no other  
treatment  
looks so  
convenient

Many women with genital warts would welcome the convenience and dignity of treating themselves at home.

New Warticon Fem makes self-treatment practical by the simple inclusion of a mirror in every pack.

Proven to be effective<sup>1</sup> and well tolerated<sup>2</sup> when used in this way,

Warticon Fem is now a clear first choice treatment.

NEW  
**Warticon**  
*fem*  
Podophyllotoxin 0.5%w/v

Clearly simple enough for  
self-application in female genital warts

**ABBREVIATED PRESCRIBING INFORMATION** Warticon, Warticon Fem: Podophyllotoxin 0.5% w/v. **Presentation:** An acidic ethanolic solution of 0.5% w/v podophyllotoxin. **Uses:** For the topical treatment of condyloma acuminata affecting the penis or the female external genitalia. **Dosage and Administration:** The affected area should be thoroughly washed with soap and water, and dried prior to application. Using the applicator provided, the warts should be painted twice daily for 3 days. The treated area should be allowed to dry. If residual warts persist, this 3-day treatment may be repeated, at weekly intervals, if necessary, for a total of 4 weeks of treatment. The majority of patients will not require in excess of 30 loops for each application, however a maximum of 50 loops per application (equivalent to 250µl of Warticon Solution) may be applied. Where lesions are greater in area than 4cm<sup>2</sup>, it is recommended that treatment takes place under the direct supervision of medical staff. **Contra-Indications, Warnings, etc:** Open wounds following surgical procedures should not be treated with podophyllotoxin. Hypersensitivity to podophyllotoxin is a contra-indication. Avoid contact with the eyes. In the event of the preparation entering the eye, the eye should be thoroughly bathed in water. **Side effects:** Local irritation may occur on the second or third day of application associated with the start of wart necrosis. In the majority of cases the reactions are mild. Tenderness, smarting, erythema, superficial epithelial ulceration and balanoposthitis have been reported. Local irritation decreases after treatment. **Use in Pregnancy:** Do not use during pregnancy or lactation. **Overdosage:** There have been no reported overdoses with Warticon Solution. No specific antidote is known. Following accidental spillage, wash the skin well with soap and water. In the event of accidental ingestion give emetic or stomach washout. Treatment should be symptomatic and in severe oral overdose ensure the airway is clear and give fluids, check and correct electrolyte balance, monitor blood gases and liver function. Blood count should be monitored for at least five days. **Pharmaceutical Precautions:** Product should be stored at room temperature. **Legal Category:** POM. **Package Quantities:** Each bottle contains 3ml of Warticon Solution. Plastic applicators are also enclosed in each pack. Each loop will carry a volume of approximately 5µl Warticon Solution. Warticon Fem also contains a mirror to facilitate accurate application. **Basic NHS Cost:** Warticon 3ml £14.50, Warticon Fem 3ml £14.50. **Product Licence Number:** PL3863/0007 **Date of Preparation:** March 1994.

# JOURNAL OF CLINICAL PATHOLOGY

## Borderline nuclear changes in cervical smears: Guidelines on their recognition and management

The guidelines on borderline nuclear changes provide definitive, clear and up-to-date guidance on the interpretation and reporting of cervical smears. They offer a framework for uniformity of practice, and chart a helpful course through the many subtleties and distinctions in cell changes seen on cervical smears.

Commissioned by the National Coordinating Network of the National Cervical Screening Programme and written by representatives of the British Society of Clinical Cytology and the Royal College of Pathologists, the guidelines clarify and expand on previous recommendations, and address the vital questions:

- in what circumstances are borderline nuclear changes often reported?
- what is the appropriate follow up procedure?
- in what circumstances is it more appropriate to report a smear as negative or unsatisfactory?
- when do the appearances justify such a definition?
- when do changes indicate the need for colposcopy?
- what is the distinction between borderline nuclear changes and mild dyskaryosis?

In the light of the recent changes to the cervical screening programme announced by Sir Kenneth Calman, chief medical officer, these guidelines are of particular relevance for resource management in the NHS and the long term health of women. They can help avoid unnecessary and costly investigations and alleviate the anxiety of patients.

These guidelines are:

- clearly written
- practical
- fully illustrated in colour
- comprehensive
- in accessible step-by-step format

The Guidelines will be published in the June 1994 issue of *Journal of Clinical Pathology*. A limited number of copies of the paper will be available from BMJ Publishing Group subscription department at £5.00/US\$7.50\*. To guarantee your copy order now using the form below or by calling our credit card hotline on 071 383 6270.

# BASIC MOLECULAR AND CELL BIOLOGY

The study of disease at the molecular and cellular level is revolutionising medicine. Already spectacular progress has been made in identifying the genes involved in some diseases and in understanding cancer pathogenesis, opening up exciting new possibilities for treatment. In *Basic Molecular and Cell Biology* leaders in the field explain the techniques of molecular and cell biology, which are being applied in specialties as far apart as cardiology and diabetes, and describe their implications for medicine. It will enable doctors, students, and researchers to gain a basic understanding of the subject and some insight into the way in which the medical sciences will be moving over the next few years.

This second edition has been extensively updated and expanded, with four new chapters added.

#### CONTENTS INCLUDE:

- **Molecular and cell biology in clinical medicine: introduction**  
David Weatherall
- **The polymerase chain reaction: a tool for molecular medicine**  
A F Markham
- **Gene regulation**  
David S Latchman
- **Genes and cancer**  
Richard G Vile, Myra O McClure, Jonathan N Weber
- **An introduction to cells**  
Lewis Wolpert
- **The cell nucleus**  
R A Laskey
- **Sorting signals and cellular membranes**  
Graham Warren

## NEW REVISED EDITION

## Medical Statistics on Personal Computers

A Brown, / Swanson Beck

do you get the best out of the software available for analysing statistical data on S? This practical guide has been completely revised and updated and includes new chapters on survival analysis, statistical power calculations, writing up statistical analyses for medical papers, and useful notes on packages available.

**£10.95; Overseas £13.00**

**MA members £9.95; £12.00)**

pages Second edition April 1994

## Statistics in Practice

Sheila M Gore, Douglas G Altman

This authoritative book clearly and simply explains how to design studies, apply statistical techniques, and interpret studies using statistics.

**UK £9.95; Overseas £11.00**

(BMA members £7.95; £10.00) 107 pages 1982

## Statistics at Square One

T D V Swinscow

The classic "beginner's guide", providing step by step instruction on the tools of the statistician such as: standard deviation,  $\chi^2$  tests, non-parametric tests, and correlation.

**UK £4.95; Overseas £6.00**

(BMA members £4.45; £5.50)

94 pages Eighth edition 1983

## Statistics with Confidence

*Martin / Gardner,*

Douglas G Altman

For everyone using statistical methods to present their findings, this book gives the reasons for using confidence intervals, followed by detailed methods of calculation, including numerous worked examples and specially compiled tables.

### Confidence Interval Analysis (CIA)

*Martin J Gardner,*

Stephen B Gardner, Paul D Winter

This microcomputer disk with manual takes the sweat out of calculating confidence intervals. The program can be used alone or with *Statistics with Confidence*.

Software is available for IBM compatibles on either 5  $\frac{1}{4}$  or a 3  $\frac{1}{2}$  inch disk.

**UK £65.00** Educational establishments, research institutes, and the NHS: **£45.95 (inc. VAT)** 82 pages 1989

...WITH BARELY  
A RIPPLE<sup>+</sup>

**Abbreviated prescribing information for DIFLUCAN<sup>®</sup> (fluconazole)**

**Presentation:** Capsules containing 50mg, 150mg or 200mg fluconazole; intravenous infusion containing fluconazole 2mg/ml in 0.9% sodium chloride solution; Powder for Oral Suspension available as two dosage strengths containing either fluconazole 50mg/5ml or 200mg/5ml on reconstitution with 24ml water.

**Indications and dosage:** Systemic candidiasis: 400mg on the first day followed by 200-400mg once daily. Cryptococcosis, including meningitis: 400mg on the first day followed by 200-400mg once daily. Maintenance therapy to prevent relapse of cryptococcal meningitis in patients with AIDS: 100-200mg daily. Oropharyngeal candidiasis: 50-100mg once daily for 7-14 days or longer in immunocompromised patients. Other mucosal candidal infections: 50-100mg once daily for 14-30 days. Prevention of fungal infections in neutropenic patients following cytotoxic chemotherapy or radiotherapy: 50-100mg once daily whilst patients are predisposed to such infections. Dermal fungal infections: 50mg once daily for up to 6 weeks (usually 2-4 weeks - see data sheet). Vaginal candidiasis: single 150mg dose. *Use in the elderly* - as above except for those renally impaired - see data sheet. *Use in children* - not recommended. **Administration:** DIFLUCAN may be administered either orally or by intravenous infusion at a rate of approximately 5-10ml/min. The dosages for the two routes are equivalent. **Contraindications:** Hypersensitivity to fluconazole or related azoles, pregnancy and women of childbearing potential unless adequate contraception is employed.

**Warnings:** Lactation: Not recommended. Renal impairment: dosage reduction may be necessary, see data sheet. **Drug interactions:** Anticoagulants, cyclosporin, oral sulphonylureas, phenytoin, rifampicin or theophylline. **Side-effects:** Nausea, abdominal discomfort, diarrhoea, flatulence and rarely anaphylaxis. **Legal Category:** POM. **Basic NHS Cost and Package Quantities:** DIFLUCAN capsules in calendar packs containing 7 x 50mg (£16.61, Pl. 57/0289), 7 x 200mg (£66.42, Pl. 57/0317) or 1 x 150mg (£7.12, Pl. 57/0290); Powder for Oral Suspension, 35ml bottle of 50mg/5ml (£16.61, Pl. 57/0343), 35ml bottle of 200mg/5ml (£66.42, Pl. 57/0344); Intravenous Infusion: 25ml (50mg) bottle (£7.32, Pl. 57/0315); 100ml (200mg) bottle (£29.28, Pl. 57/0315). Hospital prices are available on request. <sup>+</sup>DIFLUCAN is well tolerated with few adverse effects - Data on file. Pfizer Ltd. \* Trade Mark. Further information on request.
